### DRIFT THICKNESS (DT) CLASSIFICATION

DT class	Description	Surficial geology map unit example*	Implications for exploration
1	Bedrock is the dominant unit exposed at surface.	R; R.Tv	Bedrock occurs at surface; optimal target for bedrock mapping and sampling programs.
2	Bedrock outcrops are common but not dominant, otherwise sediment cover is thin (<2 m).	Tv,R	Bedrock occurs at surface in less than half of drift thickness class 2 units. Bedrock mapping and sampling programs should target topographic highs where bedrock is most common. Bedrock may also be exposed in streams and meltwater channels where modern or glacial watercourses have eroded drift. Bedrock can typically be accessed in hand-dug pits on topographic highs where sediment cover is thin, but deeper excavations are required in concavities.
3	Bedrock is overlain by a continuous veneer (<2 m) of sediment with minor outcrop occurrences.	Tv	Bedrock may be exposed in streams and meltwater channels where modern or deglacial watercourses have eroded drift. Bedrock may be accessible in hand-dug pits on topographic highs where sediment cover is thin, but deeper excavations are required in concavities.
4	Bedrock is likely overlain by a continuous blanket (>2 m) of sediment.	GLv/Tb	Bedrock is unlikely to occur at surface; may be accessed with a small excavator on some topographic highs, but deeper excavations or drilling will be required in concavities. My be suitable for drill-supported till sampling where till does not occur at surface, or where profile sampling is desired.
5	Bedrock is likely overlain by thick depositional landforms and/or multiple stratigraphic sediment units.	GFC; GLb/Tb	Bedrock does not occur at surface. Minimum drift thicknesses of 5 m are expected. Deep excavations or drilling will be required to reach bedrock. Optimal locations for drill-supported till sampling where till does not occur at surface, or where profile sampling is desired.

\*For full explanation of surficial geology classification see companion map publication "Surficial geology of the Summit Lake map area (NTS 093J/07), British Columbia, Geoscience BC map 2021-03-05c"
